

26th August 2016

*To Whom This May Concern:*

*Ammar participated in a six week internship with TalkFood, in the development of the prototype product, as the lead in the implementation of front end TalkFood.ca website.*

*He showed a lot of commitment and dedication towards the project from the onset. In regards to his strengths, Ammar has a disciplined work ethic that allows him to find solutions quickly, and execute tasks efficiently.*

*He was also responsible for the system and networking administration, servers, Remote Desktop and domain installation and management.*

*He used tools, programming languages and platform such as Microsoft Azure, Visual Studio, PHP, CSS, HTML and JavaScript.*

*As you can tell Ammar played an instrumental part in Talkfood's operations and development.*

*We would consider him an asset to any future employer looking for a driven software developer.*

*Sincerely,*
